OpenGeoSys Training 2026 – KIGAM

Lecture 0: Course Overview | OGS Introduction

Olaf Kolditz, Mehran Ghasabeh

[1]Helmholtz Centre for Environmental Research – UFZ, Leipzig

[2]Technische Universität Bergakademie Freiberg – TUBAF, Freiberg

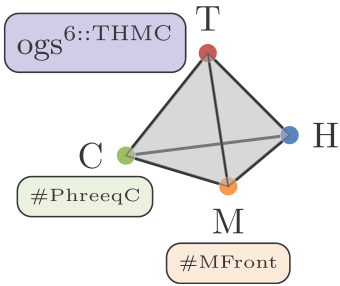

[3]Technische Universität Dresden – TUD, Dresden

Daejeon, 11th October 2026

DECOVALEX 2027

Agenda

1. OGS Course Overview
2. OpenGeoSys Introduction
   - OGS-THMC
   - History
   - Software Engineering
   - OGSTools
   - Benchmark Gallery
   - ModelHub
3. References

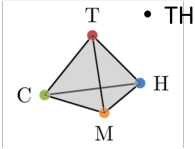

Lectures

- Continuum Mechanics
- Hydromechanics
- Geomechanics

OGS Framework

- ogs^{THMC}
- ogs^{Tools}
- ogs^{Workflows}
- ogs^{DigitalTwins}

Exercises

- ogs installation
- H: Theis: Pumping test
- H: STIMTEC: Hydraulic tests
- H: Selke: Catchment
- M: Kirsch: Excavation
- HM: Fault reactivation
- THM: FE experiment

Part 1 morning session
lectures and software demonstration

Part 2 afternoon session (optional)
hands-on work with OGS (exercises)

Olaf

Lectures

- L0 Course Overview | OpenGeoSys Introduction
- L1 Continuum Mechanics
- L2 Hydromechanics
- L3 Groundwater Modeling

Overleaf: `https://www.overleaf.com/read/gpfdtpzqrjvp#ffc4c4`

Exercises

- E0 OpenGeoSys: OGS basics, Benchmark Gallery, GitHub
- E1 Theis: Pumping well
- E2 STIMTEC: Pumping test in fractured rock
- E3 Selke: Catchment modeling

GitHub: `https://github.com/OlafKolditz/ogs-course-2026`

DECOVALEX 2027

Mehran

Lectures

- L4 Underground Tunnel Excavation
- L6 Hydro-Mechanically Coupled Processes in Fault-Controlled Porous Medium
- L7 Heated Tunnel Problem

Exercises

- E0 Tunnel Convergence Problem
- E1 Theis: Pumping well
- E2 STIMTEC: Pumping test in fractured rock
- E3 Selke: Catchment modeling

github:
`https://github.com/mehranqsb/OGSTrainingCourse_KIGAM_ZJU`

DECOVALEX 2027

OpenGeoSys Introduction

OpenGeoSys THMC

Application areas

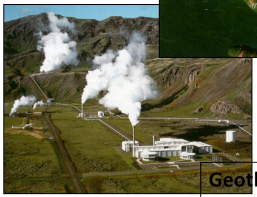

Water Resources

Water Quality

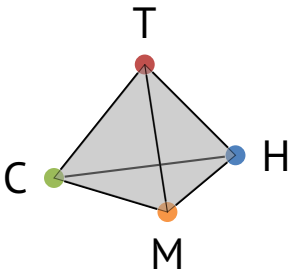

Geotechnical Systems

Geothermal Energy

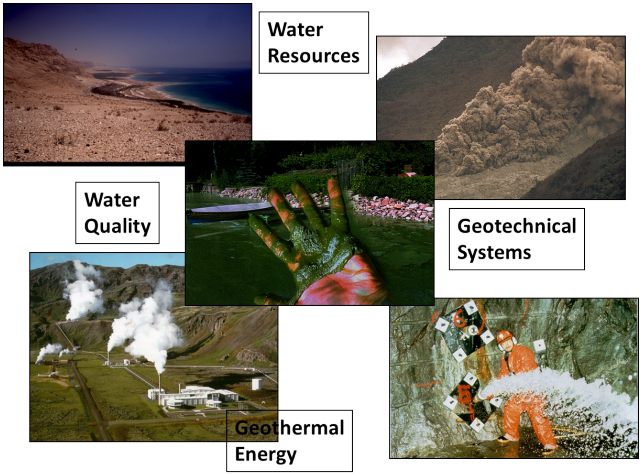

DECOVALEX 2027

OpenGeoSys THMC

Framework

ogs-applications:

- T geothermal
- H geohydrological
- M geomechanical
- C geochemical (RTP)

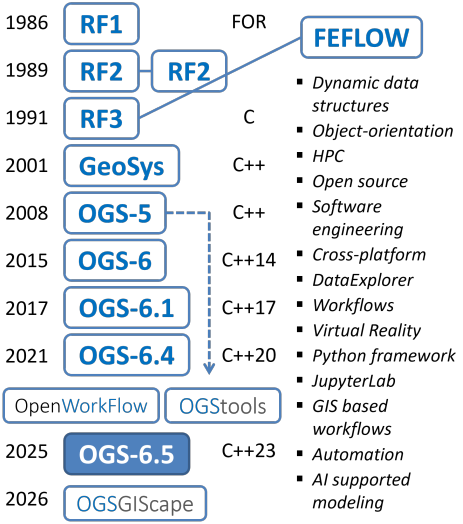

ogs-brands:

- ogs^{THMC}
- ogs^{Tools}
- ogs^{Workflows}
- ogs^{DigitalTwins}

DECOVALEX 2027

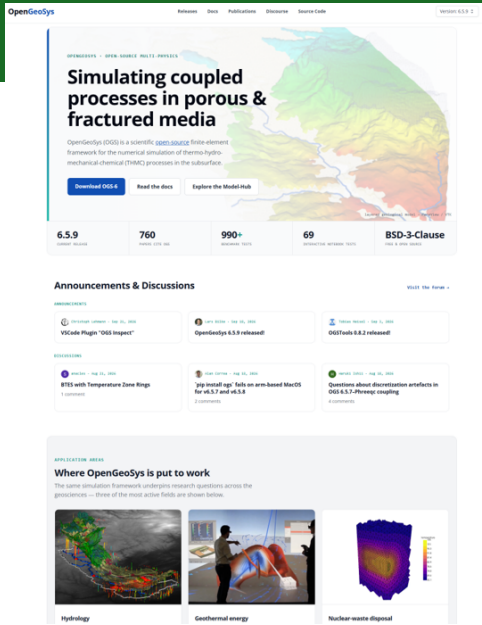

OpenGeoSys

History | Website

FEFLOW

- *Dynamic data structures*
- *Object-orientation*
- *HPC*
- *Open source*
- *Software engineering*
- *Cross-platform*
- *DataExplorer*
- *Workflows*
- *Virtual Reality*
- *Python framework*
- *JupyterLab*
- *GIS based workflows*
- *Automation*
- *AI supported modeling*

OpenGeoSys

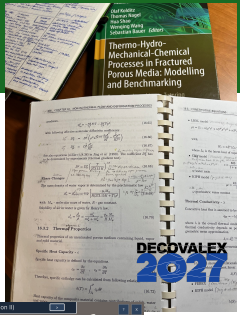

History

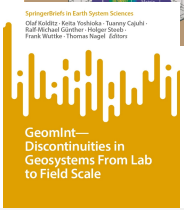

1986	**RF1**	FOR	**FEFLOW**
1989	**RF2**	**RF2**	
1991	**RF3**	C	
2001	**GeoSys**	C++	
2008	**OGS-5**	C++	
2015	**OGS-6**	C++14	
2017	**OGS-6.1**	C++17	
2021	**OGS-6.4**	C++20	
	OpenWorkFlow	OGStools	
2024	OGSGIScape	C++23	
2026	**OGS-6.9**		

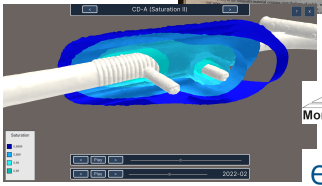

- *Dynamic data structures*
- *Object-orientation*
- *HPC*
- *Open source*
- *Software engineering*
- *Cross-platform*
- *DataExplorer*
- *Virtual Reality*
- *Python framework*

Contents lists available at ScienceDirect

Computers and Geotechnics

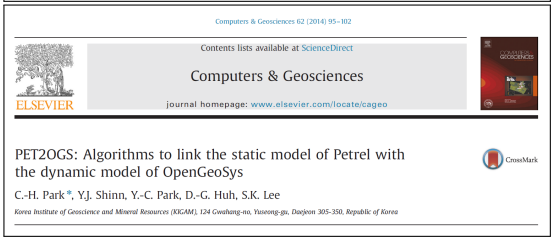

journal homepage: www.elsevier.com/locate/compgeo

Research paper

A monolithic finite element formulation for coupled thermo-hydro-mechanical analysis with two-phase flow: Formulation and verification

Chan-Hee Park *, Jung-Wook Park

Korea Institute of Geoscience and Mineral Resources (KIGAM), 124 Gwahak-ro, Yuseong-gu, Daejeon, 34132, Republic of Korea

Computers & Geosciences 62 (2014) 95–102

Contents lists available at ScienceDirect

Computers & Geosciences

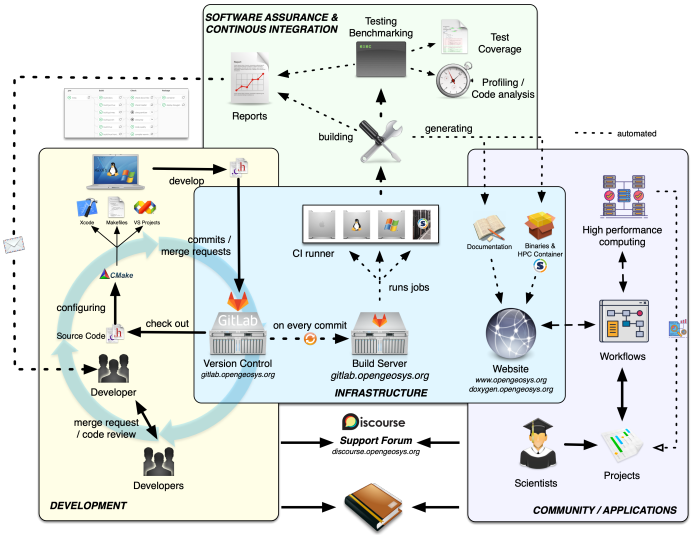

journal homepage: www.elsevier.com/locate/cageo

PET2OGS: Algorithms to link the static model of Petrel with the dynamic model of OpenGeoSys

C.-H. Park *, Y.J. Shinn, Y.-C. Park, D.-G. Huh, S.K. Lee

Korea Institute of Geoscience and Mineral Resources (KIGAM), 124 Gwahang-no, Yuseong-gu, Daejeon 305-350, Republic of Korea

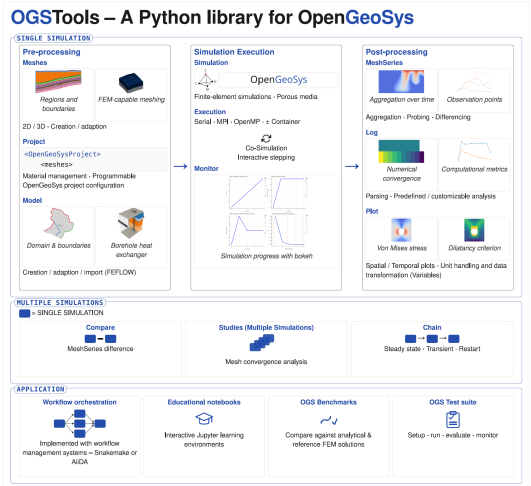

- PCH launched version in OGS 4/5 (github) and particle tracking
- OGS#PETREL interface for coupling structure and numerical models (C.-H. Park et al. 2014)
- OGS#FLAC/PFC hydro-mechanical coupling (J.-W. Park et al. 2025)
- monolithic TH2M model in OGS (Chan-Hee Park and J.-W. Park 2026)
- KIGAM is an important partner in DECOVALEX

Notes

- CI (continuous integration) system
- OGS chatbot (wip) for project files
- Guix for reproducibility
- AiiDA for provenance
- Data integration from DBs
- OGSTools for compact workflows

Ref: Bilke et al. (2025)

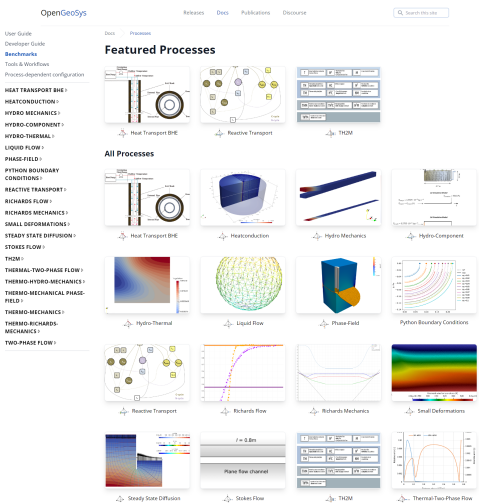

Notes

- basics for building workflows
- comprehensies can be organized by OGSTools
  - automated grid convergence
  - ensemble Monte-Carlo runs for uncertainty studies
  - LLM assistant being developed
- OGSTools is the link to AI

Ref: Meisel et al. (2026)

https://ogstools.opengeosys.org/stable/

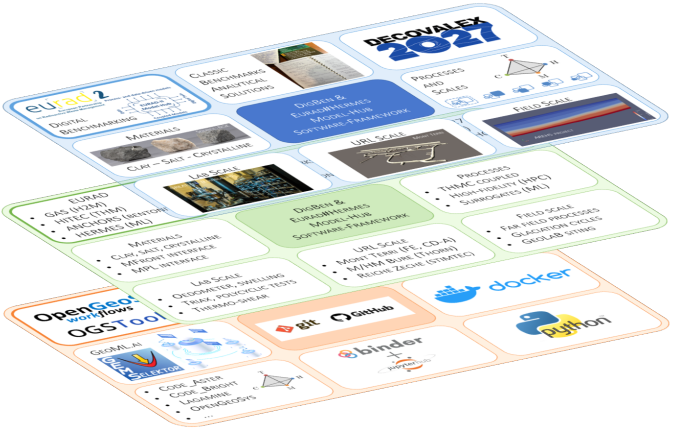

Notes

- Organized by processes (THMC concept)
- Starting point for own OGS models
- Jupyter notebooks (running on ogs-binder server)
- Context and complete workflows (relying on OGSTools)

https://www.opengeosys.org/6.5.9/docs/benchmarks/

OpenGeoSys

ModelHub

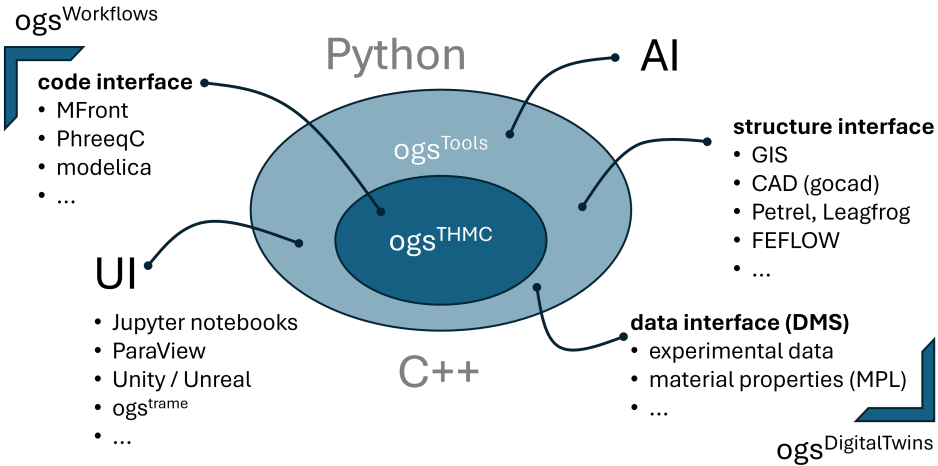

Notes

- Platform for joint benchmarking
- Initiated by EURAD and DECOVALEX projects
- Organized by application scales
- Interactive platform (via git)

Ref: Kolditz et al. (2026)

https://www.opengeosys.org/6.5.9/docs/hub/

DECOVALEX 2027

How you can get involved - become part of the community:

- providing interesting benchmarks (ideally as Jupyter notebooks) for the gallery
- trying OGS for your studies and keep record in a repo (github, gitlab etc.)
- publish your studies together with code
- participating the annual community meeting
